**Tools Required:**

Power Drill  
Level  
Combination Square

Safety Glasses  
Pencil

Tape Measure  
Center Punch

3 /16" & 5 /32" Allen Wrenches  
#2 and #3 Phillips Screw Drivers

# !!!CHECK BEFORE STARTING!!!

Wide Stile (Surface Strike)
Minimum door stile 4-1/2" (114 mm). Template drawings provide door and frame structural and dimensional specifications for door and frame preparation.
Narrow Stile
Minimum door stile 2" (51mm)

Doors and frames with walls having a structural thickness (metal skin plus reinforcement, or solid wood) to engage less than (3) full screw threads, are considered unreinforced for hardware.

Unreinforced Doors: Use Sex Nuts and Bolts  
Unreinforced Frames: Use Blind Rivet Nuts (see sketch)  
Fasteners for unreinforced openings are not supplied by Detex.

Reinforced door or frame engages at least (3) screw threads.

Blind Rivet Nut

Door Must Swing Freely

Door Must Not be Warped

Door Must Not Bind

Door Must Not Sag

**NOTE:** 750mm MAXIMUM DOOR WIDTH OPENING FOR EUROPE FOR 36" DEVICE

1000mm MAXIMUM DOOR WIDTH OPENING FOR EUROPE FOR 48" DEVICE

THE SAFETY FEATURES OF THIS PRODUCT ARE ESSENTIAL TO IT'S COMPLIANCE WITH EN 1125.

NO MODIFICATION OF ANY KIND, OTHER THAN THOSE DESCRIBED IN THESE INSTRUCTIONS ARE PERMITTED.

WHEN PLACING EXIT DEVICES ON EXISTING DOORS, DETEX OFFERS SVR REINFORCEMENT KIT #101063 TO STRENGTHEN THE TOP & BOTTOM BOLT INSTALLATION

**NOTE:** LOCAL CODES MAY REQUIRE THROUGH BOLTING. SEX NUTS ARE **NOT** INCLUDED WITH THIS DEVICE. SEX NUTS CAN BE PURCHASED SEPARATELY.

Detex provides optional kits for Advantex, see last page.

FINISHED FLOOR

# MOUNTING PLATE & STRIKE INSTALLATION:

The installation of a wide or narrow device is the same except for the mounting plate (see illustration below) and plastic locator positions when marking holes. This instruction depicts a BP1 installation unless noted otherwise.

FIG. 1

MOUNTING PLATES SHOWN ABOVE FOR USE WITH LEVER TRIM

## RETROFIT NOTE: DO NOT RE-USE OLD MOUNTING PLATE!

FIG. 2

NOTE: Centercase mounting plate located in filler/trim carton

FIG. 3A WIDE STILE

FIG. 3B NARROW STILE

FIG. 3C

### NOTES:

Plastic locators are provided with an extra 1/2" flap to allow better centering of the device on the stile or can be used when installing 1/2" Astragal to give equal backset from the door edge.

IF OUTSIDE TRIM IS USED, REFER TO OUTSIDE TRIM INSTRUCTIONS NOW.

NOTE: HURRICANE rated devices MUST BE thru-bolted using either sexnuts or outside mating trim. DO NOT use self-drilling screws.

**INSTALL TOP STRIKE**

Install inner screw **AFTER** final adjustment  
(See Pg. 13 Adjustment/Troubleshooting, Note #4)

**FIG. 5C**

**NOTE: IF TOP ROD ONLY (TRO) DEVICE, SKIP THIS PAGE AND CONTINUE WITH INSTALLATION**

**MARK BOTTOM BOLT HOLES**

**INSTALL BOTTOM BOLT BRACKET:**

**NOTE: Description below is for STANDARD device. For HURRICANE device, see next page.**

1. Align two bottom holes of mylar bracket locator to previously marked hole locations.
2. Adhere mylar bracket locator to door (locator may remain permanently in place).
3. Drill through top hole of mylar bracket locator.
4. Drill holes for bottom bolt bracket.

FIG. 7A

**NOTE: Handing of bottom bolt bracket is reversible by removing hex bushing and placing in opposite end.**

FIG. 7B

**NOTE: IF TOP ROD ONLY (TRO) DEVICE, SKIP THIS PAGE AND CONTINUE WITH INSTALLATION**

Unless otherwise noted, parts and hardware shown below are supplied in Advantex Bottom Bolt Hurricane Kit (p/n 103562-1)

Use latch/strike locator to mark holes for rod cover brackets. Space evenly between top latch and centercase mounting plate

For doors greater than 7' one of the rod cover brackets should be located so it spans two pieces of rod cover. To assure this, the exact location should be marked after top rod cover is cut

Use latch/strike locator to mark holes for rod cover brackets. (Rod cover brackets should be spaced evenly between cover support bracket and centercase)

**WIDE STILE** locator placement. **Edge** of locator in line with door edge.

**NARROW STILE** locator placement. **Arrows** in line with door edge.

FIG. 8B  
INSTALL ROD COVER BRACKETS

Disregard step shown below if TRO device is being installed

**NOTE:**  
Non-Hurricane device shown for reference

FIG. 8A

AFTER POSITIONING DEVICE AGAINST DOOR,  
 INSTALL 1/4-20 x 1/4" PPH SCREWS.  
 CAUTION: MUST INSTALL TO SECURE CENTERCASE  
**NOTE; FAILURE TO INSTALL VOIDS WARRANTY**

FIG. 9A

FIG. 9B

Be sure to engage  
 cam to tailpiece  
 on mounting plate  
**Note the position  
 of the cam**

FOR 03 FUNCTION ONLY

### CHECKING FOR DEVICE CLEARANCE (Cut-Off procedure if required)

Non-Electrified Minimum Fillerplate Length	
Type	Length (L)
LD	2-1/2"
HD/CD	3"

For further Cut-Down  
 information, see:  
[www.detex.com/cutdown](http://www.detex.com/cutdown)

For aluminum Advantex finish cutdown applications:

After cutting, the baseplate extrusion can be reversed to place the cut end inside the head cover. To do so, loosen the setscrew inside the aluminum baseplate extrusion and slide extrusion out, reverse, & slide back in. Tighten setscrew.

## MORTISE CYLINDER INSTALLATION CD (Cylinder Dogging) Cylinder Installation

Follow steps "a" through "g" for CD installations

- a. Remove endcap and endcap mounting bracket.
- b. Remove fillerplate.
- c. Remove and discard shipping insert and nut. Loosen (2) screws from dogging assembly.
- d. Install mortise cylinder (sold separately) with large hex nut provided.
- e. Trial fit dogging assembly. If cylinder is too short, remove spacers as necessary and reattach them under the (2) screw heads (See Figure A1). Fasten the (2) screws to the rest of the assembly.  
NOTE: The key should easily turn in both directions.
- f. Rotate key counterclockwise
- g. Assembly complete. Continue with Panic Hardware instruction.

FIG. 11A

Mark and drill holes for endcap bracket.

FIG. 11B

**NOTE:** LINK SHOULD ALWAYS BE IN TOP POSITION

FIG. 12A

**NOTE:**

If link is not in uppermost position on the centerlift, carefully remove "E" clips and reposition link on top pin of the centerlift and replace "E" clips. (An additional "E" clip is provided on opposite link pin.)

Verify carriage moves up and down smoothly when pushpad is depressed and released.

FIG. 12B

FIG. 12B  
DETAIL

FIG. 13 - Detail

TOP ROD ONLY (TRO)  
ADJUSTMENT / TROUBLESHOOTING

FIG. 13

## TOP LATCH TESTING AND ADJUSTMENT

1. Close the door.  
The holdback lever should engage the backside of the strike, allowing the latchbolt to extend.  
The device should latch securely and latchbolt should fully project into the strike cavity.
2. Press the pushpad.  
The latchbolt should retract fully and smoothly from the strike as the door opens.
3. Release the pushpad.  
The latchbolt should remain retracted until the door is closed.
4. Once the latchbolt operation has been evaluated, the strike should be checked and adjusted to allow the door to be held snug to the frame but allow free movement of the latchbolt during normal operation. When the appropriate position has been set, a third hole should be marked, drilled and tapped for a #10 screw. Lock the strike in position with this third screw. (See Fig. 5C)

NOTE: For centerline heights significantly higher or lower than the specified 40", it may be necessary to use shorter or longer adjustment hexbolts in the rods to effect appropriate adjustment. Additional adjustment screw lengths have been packaged in the hardware kit to provide heights up to 41-1/2" and down to 36-1/2". For some door heights it may be necessary to cut the rod. Be sure to cut the un-threaded end.

## TROUBLESHOOTING

1. Latchbolt does not completely relatch when closing the door  
Loosen the strike screws and adjust the strike to allow the latchbolt to completely extend into the strike.  
Tighten the screws and add the third center screw to lock the strike in place.
2. Latchbolt fails to retract when pushpad is pushed  
Check centercase assembly and verify that the link is attached to the TOP post of the centerlift assembly (see Fig. 12A).
3. Latchbolt is slow or does not completely extend when door closes.  
Check position of rod dampener and move it below rod cover bracket.  
Check rod adjustment (Fig 13).  
Check centercase, verify that the 1/4-20 x 1/4" screws have been installed (See Fig. 9A).

TOP ROD COVER INSTALLATION

FIG. 14

TOP COVER INSTALLATION FOR 7 FT & 8 FT DOORS

FIG. 15

TOP COVER INSTALLATION FOR DOORS OVER 10 FT TALL

FIG. 16

For top rod only device (TRO) skip to Fig. 24 on page 19 and continue

**NOTE: FOR TOP ROD ONLY DEVICE (TRO) SKIP TO FIG.24 ON PAGE 19 AND CONTINUE**

**INITIAL BOTTOM ROD ADJUSTMENT:**

**NOTE: Description below is for STANDARD device. For HURRICANE device, see next page.**

FIG. 17A

To set bottom rod length, measure the distance from the slot (see detail) in the carriage to the floor (or threshold) & add 3/4". Adjust the bottom bolt and lock with locking nut

FIG. 17B

After setting rod length, carefully slide rod assembly thru plastic rod cover support bracket & into metal bottom bolt bracket

FIG. 17C

**DUST PROOF STRIKE INSTALLATION**

FIG. 18A

FIG. 18B

FIG. 18C

Drill holes for strike mounting screws and secure strike with screws provided with dust proof strike.  
Drill 3/16" hole for plastic anchor.  
Drill 5/16" hole for metal anchor.

FIG. 19

If additional length is required, adjust bottom bolt to required length. Be sure to tighten the locking nut.

Adjust Bolt for approximately 1/16" clearance between end of bolt and surface of strike when retracted.  
Open and close door to be sure bolt does not hit high areas of floor.  
Re-adjust if necessary. Confirm that the bolt drops freely and does not bind when latch is released

FIG. 20

**BOTTOM LATCH Testing and Adjustment**

- Testing**
1. Close the door: Bolt should drop into the "dust proof strike" as the door moves into the fully closed position.
  2. Press the pushpad and open the door: The bottom latch bolt should retract out of the dust proof strike and clear the strike by 1/16" to 1/8". Vertical travel of the bolt should be 3/4".
  3. Release the pushpad: bolt should remain retracted until the door is closed.

**Adjustment**

1. If bottom bolt drags the floor or hits edge of dust proof strike:  
Loosen bolt retainer in the carriage assembly and pull bolt from carriage. Screw bolt onto bottom rod one or two turns and return it to the carriage. Test door to assure clearance and secure bolt in carriage by tightening bolt retaining plate.
2. If bolt does not completely drop when the latch is released:  
Check the bottom bolt bracket and be sure the bolt is aligned in the hexagonal plastic bushing. Proper alignment will allow the bolt to freely drop through the bushing.

**NOTE: FOR TOP ROD ONLY DEVICE (TRO) SKIP TO FIG.24 ON PAGE 19 AND CONTINUE**

**BOTTOM ROD & BOLT FOR HURRICANE DEVICE**

FIG. 17A

To establish bottom rod length, measure the distance from the slot in the carriage to the floor or threshold (XX") and add 5/8".

FIG. 17B

5/8" BOLT ENGAGEMENT  
Finished Floor

FIG. 17C

Insert rod into bottom bolt. Align holes in rod and bolt that will result in overall length closest to dimension needed. Adjust threaded hexbolt at opposite end of rod for fine adjustment of length. Mark location on rod where it meets the bolt and/or tape bolt in position.

FIG. 18

Place bottom bolt and rod assembly into bottom bracket. Slide the pin through the slot of the bracket through the bolt and rod assembly. Insert pin clip. Use 1/4 x 20 bolt at top of rod to obtain final adjustment. When properly adjusted, pin will be located at or near the index mark on the bracket.

FIG. 19

Lock bolt head firmly in place in carriage with plate, starwasher & screw

Rotate bolt for minor rod height adjustment.

FIG. 20A

With Door closed use tip of Bolt to mark location for Strike

FIG. 20B

Drill 1" hole for strike (minimum depth - 3/4")

FIG. 20C

Attach strike (P/N 103546) to floor or threshold

Drill holes for strike mounting screws & secure strike with screws. Drill 3/16" hole for plastic anchor. Drill 5/16" hole for metal anchor.

BOTTOM BOLT TESTING AND ADJUSTMENT FOR HURRICANE DEVICE

**BOTTOM BOLT Testing and Adjustment**

**Testing**

1. Close the door; bolt should drop into the strike as the door moves into the fully closed position.
2. Press the pushpad and open the door.

The bottom latch bolt should retract out of the strike and clear the strike by 1/16" to 1/8". Vertical travel of the bolt should be 3/4".

3. Release the pushpad; bolt should remain retracted until the door is closed.

**Adjustment**

**1. If bottom bolt drags the floor or hits edge of strike:**

Loosen bolt retainer in the carriage assembly and pull bolt from carriage.

Screw bolt onto bottom rod one or two turns and return it to the carriage.

Test door to assure clearance and secure bolt in carriage by tightening bolt retaining plate.

# BOTTOM ROD COVER INSTALLATION

FIG. 21

Measure from bottom of mounting bracket to inset shoulder as shown for rod cover length

STANDARD DEVICE

HURRICANE DEVICE  
see page 9 for cover installation

FIG. 22

FIG. 23

## Install Centercase Cover & Sign

Install centercase cover **LAST**. Be sure edges of rod covers are not exposed.

6-32 x 3/8" PFHU

**NOTE:** TRO device requires hole cap in bottom rod cover slot (taped inside cover)

These components do NOT apply to TRO devices

FIG. 24

## FIRE RATED TOP ROD ONLY (TRO) DOORS

A door locking popper is required when a fire door utilizes a top latching mechanism only (TRO). The popper is designed to project a spring loaded bolt into the adjacent frame or door in the event of fire. Detex recommends installing the popper in the edge of the door 12" above the threshold or finished floor. Holes for the popper and plug must be aligned with each other.

FIG. 25

NOTE: Door/Frame reinforcement is required where popper and cap plug are to be installed.

### Narrow Stile Endcap Mounting Plate Fascia (For use on Glass Doors) (not used with EC2 endcap)

FIG. 26

- Remove the endcap mounting bracket.
- Attach the fascia with the adhesive tape as shown in Fig. 28.
- Re-attach the endcap mounting bracket.

## Optional Accessories

### Glass Bead Kit
